

#### **STERG Symposium 2017**

#### Prof. Johan van der Spuy

Solar Thermal Energy Research Group (STERG), University of Stellenbosch

# Housekeeping

- Main organiser
  - Matti Lubkoll, matti@sun.ac.za
- Safety
- ECSA accreditation K-mech-0028

### **Our Sponsors**

RENEWABLE & SUSTAINABLE ENERGY STUDIES

 $\langle \rangle \rangle$ 

visit concentrating.sun.ac.za contact sterg@sun.ac.za

- Research group
  - 75 people: academics and researchers (about 55 post grad students)
  - 75 affiliates and alumni
  - 4 quarterly meetings
  - Symposium, display of research

#### • 4 PhDs end 2016

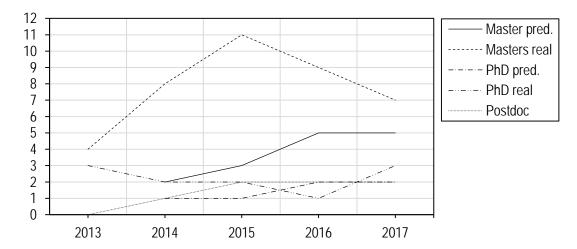

• Results from NRF Spoke report

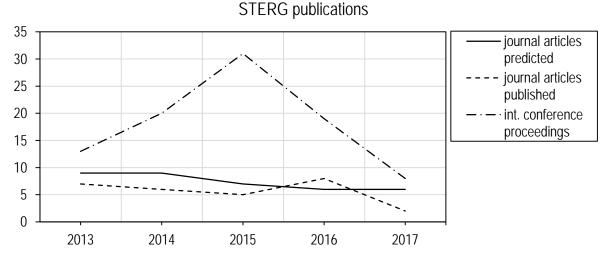

STERG's human capital output between 2013 and 2017

 $\langle \rangle$ 

Results from NRF Spoke report

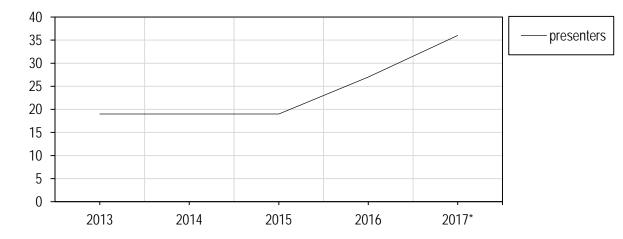

STERG's publication output between 2013 and 2017

• Results from NRF Spoke report

Presenters at STERG symposium between 2013 and 2017

# **STERG - rooftop**

- Access to wide range of laboratories.
- A 1000 m<sup>2</sup> solar rooftop laboratory with 18 m high receiver tower.
- Helio40. 40 m<sup>2</sup> heliostat field.

# **STERG - rooftop**

- Solar resource assessment and weather station with public website access
- State of the art solar water heater test facility for student research and commercial projects
- 25 kW McDonnel Douglas Sterling dish

# **STERG - labs**

- 1000 °C Kiln with automated quick charge/discharge capabilities
- 5 cubic meter, 3 ton, 600 °C thermal storage test facility
- Differential Scanning Calorimeter capable of sampling to 700 °C
- Software: Fluent CFD, ArcGIS, TRNSYS, FLOWNEX etc.
- Further access to Departmental heat transfer and flow laboratories including multiple wind tunnel

# **STERG - SUNREC**

- 100 kW Helio100 facility at Mariendahl, Stellenbosch.
- SU, TIA initiative to develop smaller, smarter and modular heliostats locally.

# **STERG - SUNREC**

- 15 kW single axis tracking PV system
- Packed bed 300 kW thermal storage pilot with gas combustor designed to be retro-fitted to an air receiver

 $\langle \rangle$ 

### **Research topics**

- SUNSPOT Stellenbosch University Solar Power Thermodynamic Cycle

 $\langle \rangle$ 

#### **Research topics**

#### Optics and receivers

– Storage

 $\langle \circ \rangle$ 

#### Research

- Dry and hybrid cooling
- MinwaterCSP

 $\langle \rangle$

#### Research

 Solar cycle analysis and simulation

- Solarised gas turbines

nts:

#### **STERG Tour**

20 attendees from SU, 5 from UP, 2 from UCT

Visited the following power plants:

- Sishen PV
- Kathu Solar Park
- Khi Solar One
- Ilanga
- Bokpoort

# **STERG** Tour

Special thanks to:

- CRSES
- all the supervisors for contributing,
- all of the power plant operators,
- construction managers,
- staff at the power plants
